

Measure your ring size

Before Measure your ring size, make sure this page is printed in A4 size and scaled to 100 %. You can check if it is correct by placing a credit card on the line below. If your card lines up correctly you can start. Be sure to choose the finger on which you want to wear the new ring.

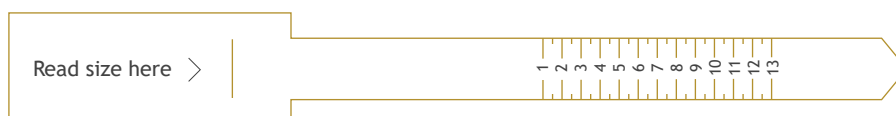

Option 1: Measure by comparing your ring.

Use an existing ring that fits you well. Match the inside of this ring with one of the circles below. Find the correct circle by placing your ring in such a way that you should only see the white circle inside your ring. If your size falls between two sizes I recommend choosing the bigger size.

Option 2: Measure with the ribbon centimeter.

Please cut out this ruler and carefully cut the line in order to create a slit. Wrap the ruler around your finger and pull the tapered end through the slit. In order to be sure that the ring fits comfortably, I suggest you also measure your knuckle. Best is to choose a size that goes on and off your finger easily.

Note

The average ring size of a woman is 52. Most of the women have a ring size between 49 and 56. A ring should fit your finger comfortably. It should be tight enough so it will not fall off, however also loose enough to slide over your knuckle (widest part of the finger).
